

Policy ENV 1: Nature Conservation Sites of International Importance

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Provides for protection, enhancement and management of nature conservation sites
	Protect and enhance biodiversity	++	Provides for protection, enhancement and management of nature conservation sites and bio diversity
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy developed
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self-sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection and enhancement of nature conservation sites will ensure visitors will continue to be attracted to the area for its high quality of environment

Comments / Amendments:

Protection of the sites may also have an adverse impact in restricting the sites available for renewable energy development. It is felt that the need to protect and enhance these sites outweighs this concern.

Policy ENV 2: Nature Conservation Sites of National Importance

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Provides for protection of nature conservation sites of national importance
	Protect and enhance biodiversity	+	Provides for protection of biodiversity within nature conservation sites of national importance
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self-sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection and enhancement of nature conservation sites will ensure visitors will continue to be attracted to the area for the high quality of environment

Comments / Amendments:

Policy only protects sites, does not allow for their enhancement. Policy should be amended in light of this. Suggested last paragraph of policy to read “Where development is permitted the use of conditions and / or planning obligations to provide appropriate mitigation and compensatory measures to ensure the protection and enhancement of the site will be considered.”

Protection of the sites may also have an adverse impact in restricting the sites available for renewable energy development. It is felt that the protection of these sites outweighs this concern.

Policy ENV 3: Nature Conservation Sites of Local Importance

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Provides for protection of Nature conservation site and bio diversity
	Protect and enhance biodiversity	+	Provides for protection of Nature conservation site and bio diversity
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy to be developed
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection and enhancement of nature conservation sites will ensure visitors will continue to be attracted to the area for its high quality of environment

Comments / Amendments:

Policy only protects sites, does not allow for their enhancement. Policy should be amended in light of this. Suggested last paragraph of policy to read “Where development is permitted the use of conditions and / or planning obligations to provide appropriate mitigation and compensatory measures to ensure the protection and enhancement of the site will be considered.”

Protection of the sites may also have an adverse impact in restricting the sites available for renewable energy development.

Policy ENV 4: Protection of Landscape Features and Habitats

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Provides protection for landscape features and habitats
	Protect and enhance biodiversity	++	Provides protection for landscape features and habitats
	Protect and enhance features of historical and archaeological importance	++	Provides protection for landscape features and habitats
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection of landscape features and habitats will ensure visitors will continue to be attracted to the area for the high quality environment

Comments / Amendments:

Protection of such features and habitats may serve to restrict potential sites for renewable energy development. It is felt that the need for protection of these features and habitats outweigh this concern.

Policy ENV 5: Protected Species

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Protection of species will require the protection of their habitat
	Protect and enhance biodiversity	++	Provides protection and where possible enhancement of protected species
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	-	Some existing buildings may provide habitat for protected species
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricted locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >	

Comments / Amendments:

Some existing buildings and brownfield sites provide important habitats for protected species. This is recognised by the Council and such habitats are afforded protection by other policies in the Plan. (DEV6)

Protection of such habitats may serve to restrict potential sites for renewable energy development. It is felt that the need for protection of these features and habitats outweigh this concern.

Policy ENV6: Landscapes of County Importance

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Landscapes protected from inappropriate/unsympathetic change
	Protect and enhance biodiversity	< >	
	Protect and enhance features of historical and archaeological importance	+	Character of areas maintained through protection of landscape
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	++	Protecting quality of landscapes will encourage visitors to continue visiting the area

Comments / Amendments:

Protection of such landscapes may serve to restrict potential sites for renewable energy development. It is felt that the need for protection of these features and habitats outweigh this concern.

Policy ENV7: Heritage Coast

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Protection of St Bees Head from inappropriate development
	Protect and enhance biodiversity	+	Designation will ensure protection of local biodiversity
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self-sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection of Heritage Coast will ensure visitors will continue to be attracted to the area for the high quality of environment

Comments / Amendments:

Protection of the Heritage Coast may have an adverse impact in restricting the sites available for renewable energy development. It is felt that the protection of designation sites outweighs this concern.

Policy ENV8: Views from Heritage Coast

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Provides for protection of landscape/seascape in, but not to, the Heritage Coast
	Protect and enhance biodiversity	< >	
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Potentially restricts locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	++	Protection of Heritage Coast will ensure visitors will continue to be attracted to the area for the high quality of environment

Comments / Amendments:

Protection of the views from the Heritage Coast may have an adverse impact in restricting the sites available for renewable energy development. It is felt that the protection of designation sites outweighs this concern.

In order to provide greater protection of the Heritage Coast views to and from the designation should be protected. Suggest reword policy “Views to and from the Heritage Coast”

Policy ENV9: Areas of Local Landscape Importance

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	++	Promotes public access to open space within and adjacent to built up areas
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Protection of land with amenity value within and adjacent to built up areas
	Protect and enhance biodiversity	++	Protection of land with potential biodiversity value within and adjacent to built up areas
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	< >	
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >	

Comments / Amendments:

No comments

Policy ENV10: Protection of Trees

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Protection of trees will continue to enhance both landscapes and townscapes
	Protect and enhance biodiversity	++	Protection of trees will allow for protection of associated habitat and biodiversity
	Protect and enhance features of historical and archaeological importance	+	Trees positively contribute to both historical landscape and townscape
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	< >	
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >	

Comments / Amendments:

No comment

Policy ENV11: Tree Planting

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	New tree planting which respects existing landform will enhance landscapes/townscapes
	Protect and enhance biodiversity	++	
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	< >	
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >

Policy ENV 13: Access to the Countryside

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	++	Rights of way will be protected
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	< >	
	Protect and enhance biodiversity	< >	
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy		
	Reduce number of journeys made by private car	++	Rights of way protected and support for path improvements and links to public transport

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection/improvement of rights of way will continue to encourage visitors to the area

Comments / Amendments:

No comment

Policy ENV 14: Development in the Coastal Zone

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Development in the coastal zone must not have an adverse impact on the natural landscape character
	Protect and enhance biodiversity	++	Development in the coastal zone must not have an adverse impact on areas of wildlife importance.
	Protect and enhance features of historical and archaeological importance	++	Development in the coastal zone must not have an adverse impact on areas of historic and conservation importance
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	++	Development will not be permitted where it increases the risk of flooding, coastal erosion or instability
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	++	Development will not be permitted where it would be likely to have a detrimental impact on water quality
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Development must require a coastal location – could potentially restrict locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protection and enhancement of the coast could potentially increase visitor numbers

Comments / Amendments:

Designation of a coastal zone may serve to restrict potential sites for renewable energy development.

Policy ENV 15: Undeveloped Coast

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Development only permitted in undeveloped coast which enhances quality and character of zone
	Protect and enhance biodiversity	++	Coastal habitats protected from development
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	++	Development will not be permitted where it increases the risk of flooding, coastal erosion or instability
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	Restricting coastal development may protect and enhance marine habitat quality
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	Could potentially restrict choice of locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	+	Protecting and enhancing coast could potentially increase visitor numbers

Comments / Amendments:

Designation of a coastal zone may serve to restrict potential sites for renewable energy development.

Policy ENV 16: Flooding

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	++	Provides protection from flooding and flood risk
	Protect and enhance biodiversity	++	Provides protection from flooding and flood risk
	Protect and enhance features of historical and archaeological importance	++	Provides protection from flooding and flood risk
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	++	Provides protection from flooding and flood risk
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >

No comment

Policy ENV 17: Derelict Land

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Through seeking to reclaim derelict land, landscapes and townscapes will be protected
	Protect and enhance biodiversity	+	Where present on derelict land nature conservation interest will be protected
	Protect and enhance features of historical and archaeological importance	+	Where present on derelict land archaeological interest will be protected
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.		
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	++	Promoting reclamation of derelict land could increase supply of the plan area's previously developed land suitable for reuse.
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	< >	
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >	

Comments / Amendments:

Reference to appropriate enhancement of nature conservation / archaeological interest should be included.

Policy ENV 18: Contaminated Land

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	< >	
	Protect and enhance biodiversity	< >	
	Protect and enhance features of historical and archaeological importance	< >	
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	++	Will ensure that land is fully decontaminated and increase the supply of previously developed land
	Protect and improve ground, surface and marine water quality	+	Policy will seek any contamination be removed and treated, thus potentially improving water quality (depending on type of contamination)
	Ensure that air quality is not adversely affected by development	+	Depending on type of contamination, air quality may improve as a result of decontamination
	Promote recycling, waste minimisation and renewable energy	< >	
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >

Policy ENV 37: Development affecting a Scheduled Monument

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Protects Scheduled Monuments which contribute to landscape/townscape
	Protect and enhance biodiversity	< >	
	Protect and enhance features of historical and archaeological importance	++	No development permitted which would adversely affect a Scheduled Monument's site or setting
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >	
	Ensure that air quality is not adversely affected by development	< >	
	Promote recycling, waste minimisation and renewable energy	-	May restrict locations for renewable energy development
	Reduce number of journeys made by private car	< >	

Promote and facilitate economic regeneration to achieve stable, diverse and self sustaining employment	Encourage economic growth and development	< >	
	Encourage diversification of urban and rural economies	< >	
	Improve opportunities and access to jobs	< >	
	Promote leisure and tourism and increase visitor numbers	< >	

Comments / Amendments:

Protection of the sites may also have an adverse impact in restricting the sites available for renewable energy development. Felt that protection of Scheduled Monuments outweighs this concern.

Policy ENV 38: Development affecting sites of local archaeological or historic importance

	OBJECTIVES	Score	COMMENTS
Secure a stable and balanced population whilst improving public health, safety and quality of life	Stabilise and maintain population levels within communities in the plan area	< >	
	Ensure that local facilities and services are available to everyone	< >	
	Ensure that housing needs of the community are met locally and that decent, good quality affordable homes are available to all.	< >	
	Increase community participation in decisions regarding the future of development in the planning area	< >	
Effective protection of the environment	Protect and enhance landscapes and townscapes	+	Protection of sites including those which have impact on townscape/landscape
	Protect and enhance biodiversity	< >	
	Protect and enhance features of historical and archaeological importance	++	Provides protection for locally important sites
	Ensure that development is not at risk from flooding and does not cause flooding elsewhere.	< >	
Make effective use of existing buildings and infrastructure, previously developed land and natural resources	Reuse existing buildings and previously developed land before greenfield sites	< >	
	Protect and improve ground, surface and marine water quality	< >
